reddot design award  
winner 2018

### PID Controller

EKG's PID controller steadily maintains the perfect temperature as efficiently as possible.

### Brew Stopwatch

After your water is heated, Stagg EKG's built-in Brew Stopwatch can time your brew for the perfect cup of coffee.

### Goal and Current Temp Display

Know where you're at and where you're going.

### Fahrenheit/Celsius Option

Put the calculator away. No more converting to your preferred setting.

### HOLD Option

Stagg EKG will maintain your desired temperature in either Fahrenheit or Celsius for 60 minutes.
